BOLIG

Hvordan skaffet du deg bolig?

I got a housing option from the university but it was too expensive for me to afford. The amount for a one semester hotel rent was to the tune \$5, 500.00. which was too costly for me. they have other cheaper options (from \$\$2,408) but as an exchange student, you do not have access to such housing before you get registered as a student- in my case for example, housing charged at \$2,408 was not available as of the time i was offered admission and registered into the system. the only options available to me were high rent apartment \$5, 500.00, and also housing options off campus. However, I ended up getting an off-campus option which i liked and served well as well. for the private housing, i paid 5500 nok monthly rent inclusive of bills

Vil du anbefale andre studenter å reise på utveksling - og eventuelt hvorfor?

Yes of course, at least from my experiences i think its what going for. The reason being that, the program and courses i offered relates well with my masters program in stavanger. Although i would not recommend going for an exchange to Canada if you don't have financial capability, but of course if a

student have scholarship that covers tuition and stipends i strongly recommend going for it, else it's too costly to go for! in my case i received the North2North scholarship and i am grateful for that!

Beskriv hva du har lært som fagperson gjennom utveksling?

my experience further improved on research and theoretical competencies gained in my risk analysis program in stavanger. I chose a topic for my thesis research and would start my writing my research in January, my enrollment in the exchange courses as well interesting topics taught partly informed my thesis topic choice.
